Railway PRO

THE RAILWAY BUSINESS MAGAZINE IN THE WIDER BLACK SEA AREA

	JANUARY	FEBRUARY	MARCH	APRIL	MAY	JUNE
	 Freight & Logistics	 Infrastructure Development	 Mass Transportation	 Freight & Logistics	 Infrastructure Development	 Mass Transportation

Europe Asia railway connections

Multimodal transportation

Policies, strategy, investments & operations	Challenges for freight transport on the Eurasian platform	Connecting the Eurasian platform	Challenging the urbanisation and industrialisation of the Eurasian space for railway passenger transport	Impact of multimodal transport on cargo flows	Development of multimodal transport infrastructures	Multimodality in mass transportation
Technology	Traction for a clean transport Asset management of cargo wagons	Systems and technologies for increasing speeds Reducing vibrations on railway transport networks	Optimising operating costs – adequate choice of rolling stock Technologies for railway vehicles	Methods for increasing axle loads Management of fleets for avoiding traffic-less routes	Building high-speed networks Building city-friendly railway networks	Lines and materials-rolling stock Vehicle braking– urban safety transport problem

Permanent topics: Environment, liberalisation, ports & hinterland connections, airport-railway station connections, ERTMS/ETCS, CBTC, standardisation, cross - acceptance.

Media Partnership	<ul style="list-style-type: none"> • 8.02., Intermodes, Bruxelles • 22-23.02., Club Feroviar Conference, Railway infrastructure development – policies, projects and technologies 	<ul style="list-style-type: none"> • 8/10.03., - Eurasia, Istanbul • 28-29.03., Club Feroviar Conference, Railway passenger transport in the sustainable mobility agenda 	<ul style="list-style-type: none"> • 24/26.04 UIC ERTMS World Conference • 17/18.04., Kuwait Rail • 25-26.04., Club Feroviar Conference, Efficient freight railway transport for better logistics services • 26/28.04., China International Rail Transit Technology Exhibition

	JULY	AUGUST	SEPTEMBER	OCTOBER	NOVEMBER	DECEMBER
	 Freight & Logistics	 Infrastructure Development	 Mass Transportation	 Freight & Logistics	 Infrastructure Development	 Mass Transportation
Reducing noise				Towards a harmonised railway legislation		
Policies, strategy, investments & operations	Noise – a problem affecting productivity	Solutions for reducing noise level in railway traffic	Reducing the noise level as method of increasing the rail transport attractiveness	Efficient birocracy for fast and reliable railway transport	Technical standardisation of infrastructure systems	Bringing passengers to railways
Technology	Reducing derailment risk of freight trains Cargo handling	Optimising the maintenance of railway infrastructure systems New technological challenges in building underground networks	Fight against one of the global threats – the lack of energy Technologies for increasing network transport capacity	Railway services telematics Management of depots	Extreme weather conditions – challenges for railway infrastructure management Automation technologies for urban railway system	Technical challenges posed by high-speed trains Optimising the maintenance of railway vehicles
Permanent topics	Environment, liberalisation, ports & hinterland connections, airport-railway station connections, ERTMS/ETCS, CBTC, standardisation, cross - acceptance.
